DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17 and 26-42, drawn to determining channel state information based on received space-time coded signals for feedback to a transmitter classified in class 375, subclass 267.
 - II. Claims 18, 42 and 44, drawn to transmitting beams with an embedded signature code in a signal from a first station to a second station, classified in class 375, subclass 143.
 - III. Claims 20-25 and 45-50, drawn to determining a time delay associated with a beam at a second station and setting into a variable delay line the time-delay of the encoder of a first station, classified in class 455 subclass 445.
2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. A telephone call was made to John Fleming on January 26, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2634

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
